WELCOME TO THE 2019 GOVERNOR'S AG FORUM

The tradition continues with the 28th Annual Governor's Forum on Colorado Agriculture in Denver. Attendance was approximately 430 last year and plans are underway to make 2019 just as big! The Governor's Ag Forum has established a tradition in providing top notch speakers on current industry issues in agriculture. We look forward to working with you to carry on this tradition as participants. This year the Colorado Ag Leadership Program Class 13 has brought some great speakers like Damion Mason, the new Commissioner of Ag, Kate Greenberg, and two interactive panels on the future of the food chain and legislative updates. This year's breakouts will cover issues and updates on the Water Plan, Farm Bill, Opportunity Zones, Land Trusts, Mental Health in rural communities, Community College vocational programs and more. CALP Class 13 members will also be presenting a variety of topics based on their personal projects they have been working on for the last two years. Should you have questions about your booth or the Ag Forum, please don't hesitate to contact Dani, Marty or Rian. We look forward to a great year.

Sincerely,

Dani Traweek
